

How to Use Your Eyelet Setter

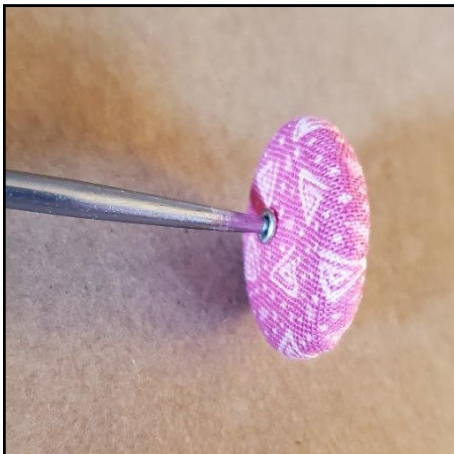

1. Assemble buttons with eyelet backs and shells.

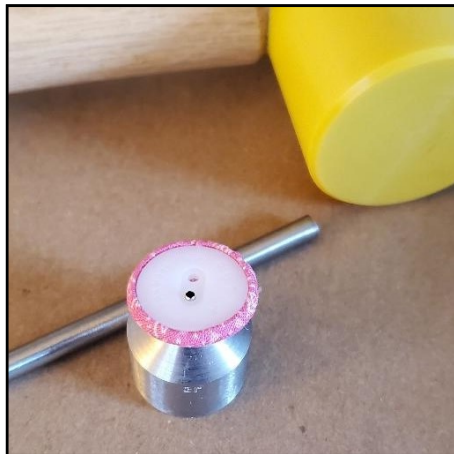

2. Use a small, very sharp awl to poke holes through fabric into back openings.

3. Place eyelet loosely on awl to facilitate insertion.

4. Push eyelets through holes and remove awl, leaving eyelets in place.

5. Flip button upside-down on anvil with pin through hole. Fit shaped end of tool into eyelet.

6. Whack tool gently with mallet a few times. Repeat process until all eyelets are set.
